## Introduction:

LKM has launched “Gen AI for Delivery Practitioners - Level 2 - Online” Training program which includes the introduction to GitHub Copilot topic. This module introduces Copilot feature on GitHub to the participants and allows participants to use GitHub Copilot license to practice and complete training labs.

Participants are required to first Signup on GitHub before LKM enables a GitHub Copilot license for them. For the registered GitHub users, LKM then assigns Co-Pilot license which enables them to practice using GitHub Copilot.

## Objective:

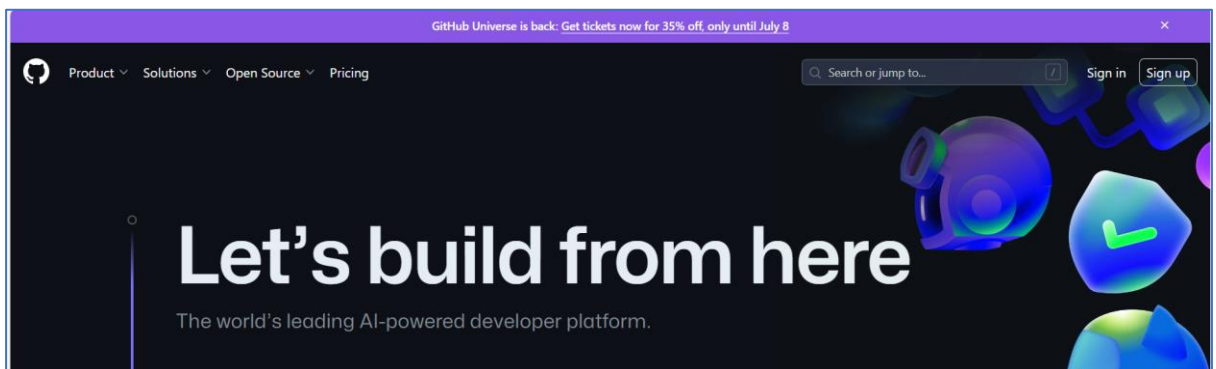

This document outlines the steps for the training participant to sign up on GitHub.

## Steps to signup on GitHub:

If you are new to GitHub and are yet to create an account, please follow the below steps to sign up.

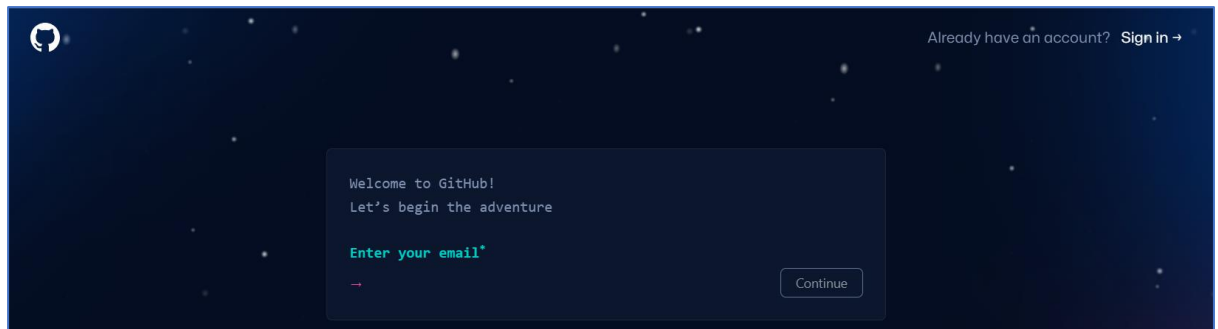

1. Open GitHub in browser using the below link:

<https://github.com/>

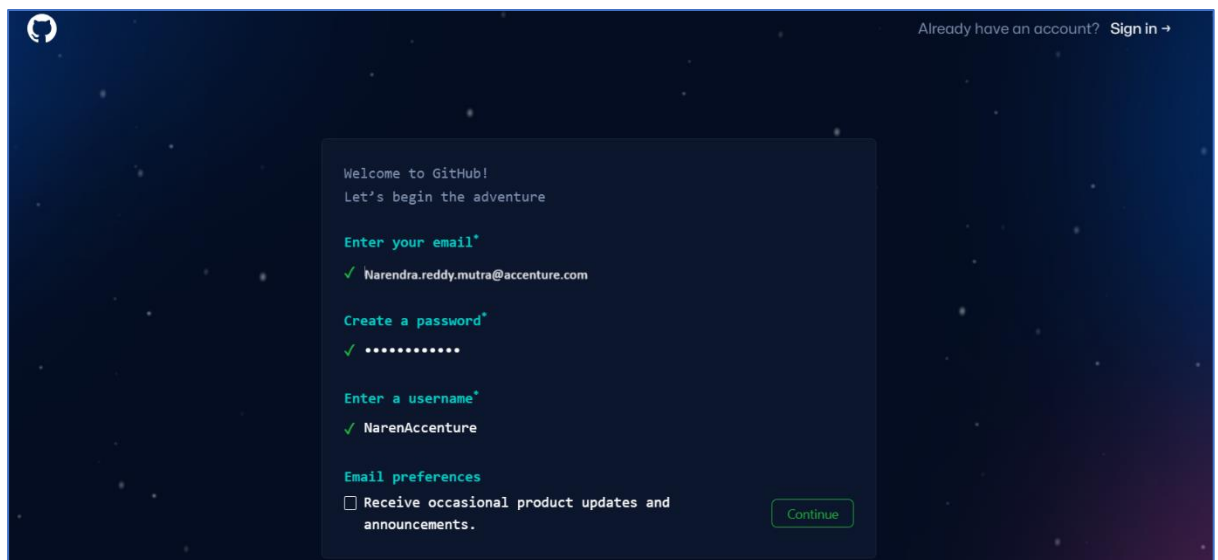

2. On the GitHub home page, click on Sign Up link to create a user account.

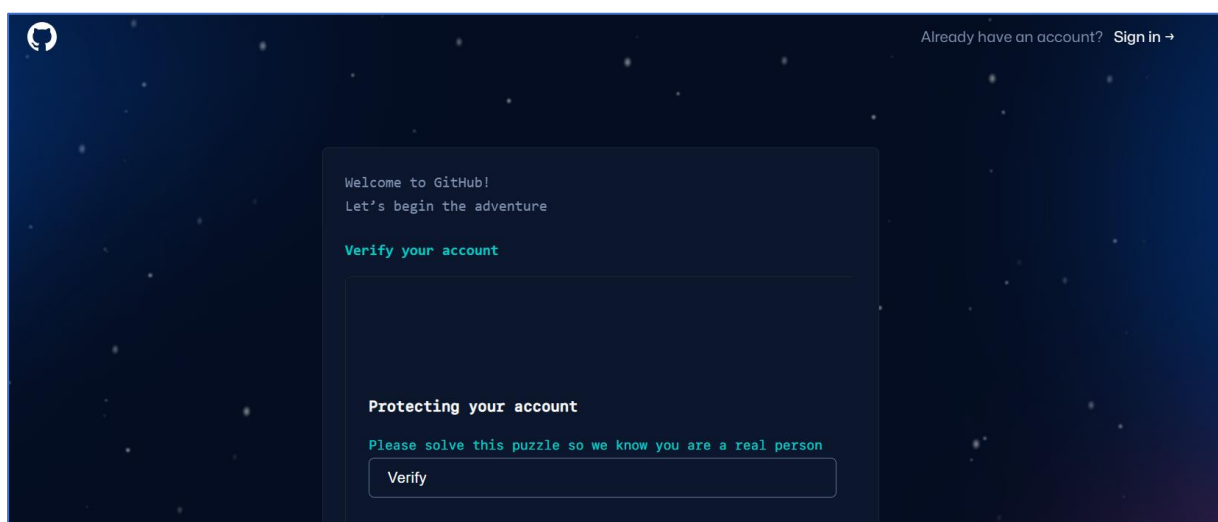

**Note:** We recommend you using Accenture Email ID for registration.

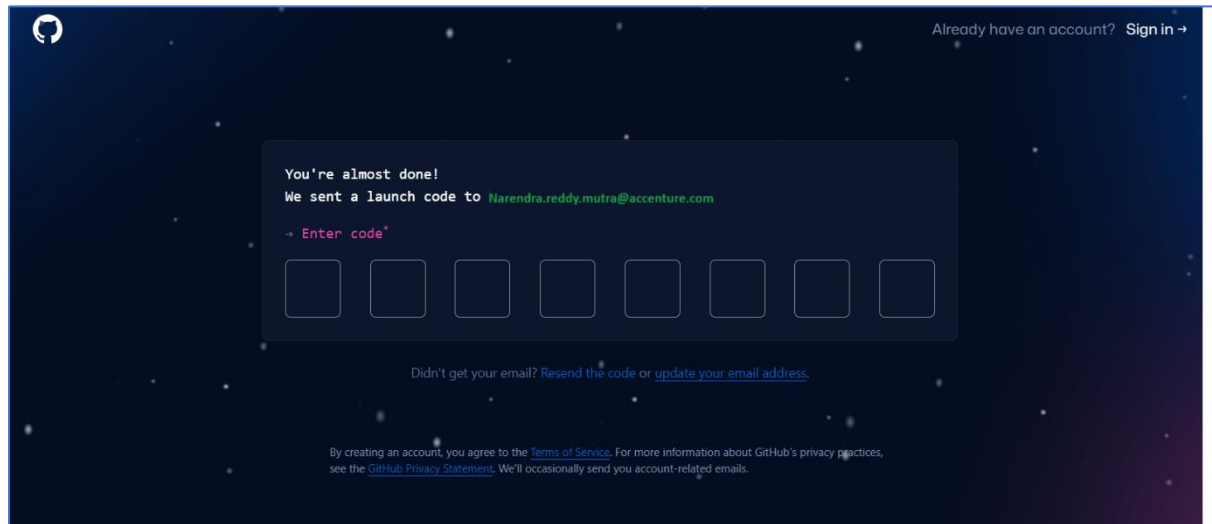

3. Enter the Email ID and click on Continue button.
4. Enter rest of the fields like password, UserName and select Email preference as shown in the below snapshot for the new Account and Click on Continue.

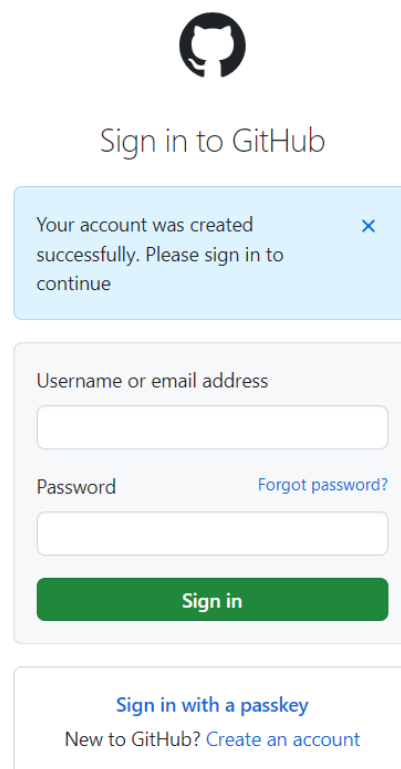

5. Click Verify button and complete the verification process as shown below.

6. Enter the launch code and press enter.

**Result:** Account is successfully created on GitHub.

**Conclusion:** The registered User Name should be entered on the GitHubCopilotRegistration Tool which can be accessed using the below link.

<https://atcitrainingtracker.accenture.com/GitHubCopilotRequisitionTool/>

Once the license is obtained, Participants can use the GitHubCopilot license for completing the labs related to the GitHubCopilot related topic.
